

Appl No. 10/647,927  
Response dated December 14, 2005  
Reply to Office Action of Sept. 15, 2005

IN THE SPECIFICATION:

Please amend the abstract as follows:

Please amend page 40, line 2 and line 10 to read as follows:

ABSTRACT OF THE DISCLOSURE

A tension multiplier jar apparatus which multiplies the tension by a multiple factor ~~of five or greater~~ using a compressible energizing fluid acting on differential areas to provide greater over-pull to jar objects in the well. There is first included an overall assembly which includes a lowermost anvil and metering sub attached on its upper end to a hammer and compression sub which is secured on its upper end to a multiplier sub which is secured on its upper end to a fourth upper spline sub. In additional embodiments there is provided a spring ~~means~~ such as Belleville springs or coiled springs to replace the energizing fluid as well as downward firing tool that can be activated without any external attachment to the wellbore. There is further provided a mechanism for cocking and firing the tool in place of the metering system.
